An Algorithm to Generalize the Pascal and Fibonacci Matrices

Ilhan M. Izmirlı

George Mason University, Fairfax, USA

Email: iizmir12@gmu.edu

It is now acknowledged that this triangle was known well before Blaise Pascal (1623-1662) who “introduced” it in his famous 1653 treatise, *Traité du triangle arithmétique*. Indeed, not only the binomial coefficients, but in fact, the addition rule, which, of course, is needed to generate the coefficients, were known to Indian mathematicians¹. For instance, according to Edwards [1], some elements of the binomial coefficients can be observed in the works of Pingala (c. 200 BC-?). A few centuries later, Varahamihira (505 CE-587 CE) gave a clear description of the addition rule [1] 2013). The triangle itself was mentioned as early as the 10th century CE, in the book *Meru-prastaara*² by Halayudha (?-?). See [2] for more details.
